

ATSPM 5 User Access Guide

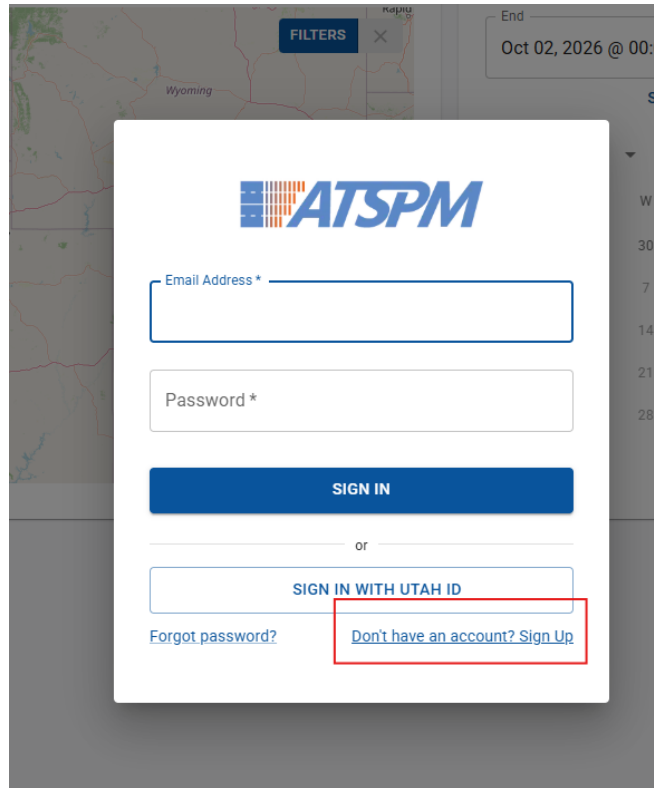

A concise guide to signing up, requesting access, and administering roles

This guide covers the normal user sign-up process and the administrator steps that follow. New users create their own accounts. Administrators do not need to create the initial account, but they may need to assign roles, geographic scope, or additional permissions after registration.

1. New user sign-up

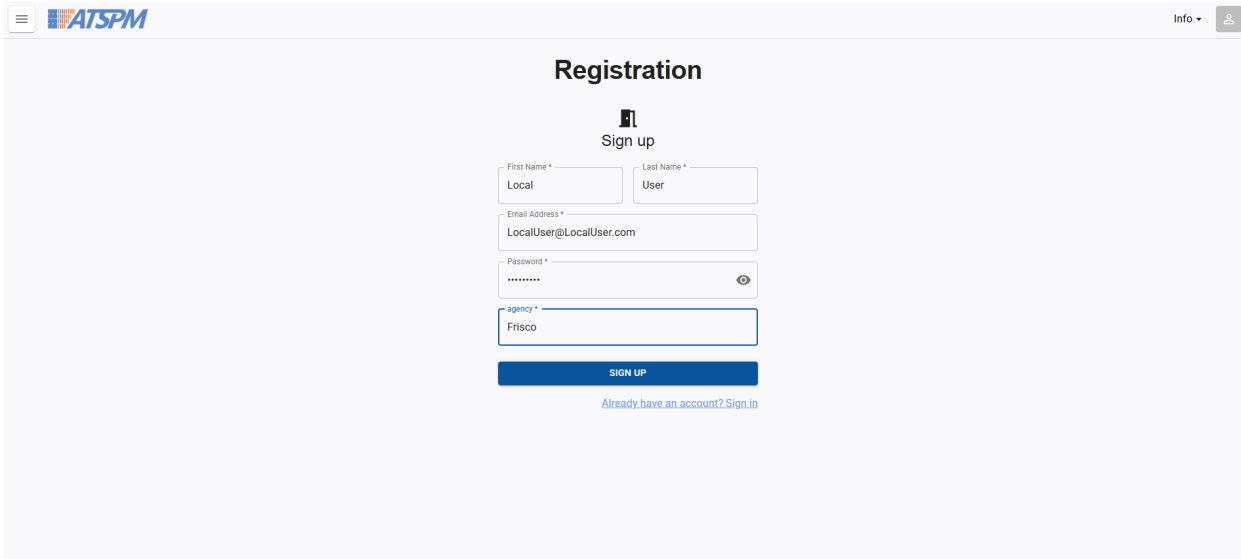

From the ATSPM 5 sign-in screen, select Don't have an account? Sign Up.

Figure 1. Select Don't have an account? Sign Up from the sign-in screen.

A screenshot of the ATSPM 5 sign-in interface. The interface features a map in the background with a 'FILTERS' button. Overlaid on the map is a white sign-in form. The form includes the ATSPM logo at the top, followed by input fields for 'Email Address *' and 'Password *'. Below these fields is a blue 'SIGN IN' button. Underneath the button is a horizontal line with the word 'or' in the center. Below this line is a button labeled 'SIGN IN WITH UTAH ID'. At the bottom of the form, there are two links: 'Forgot password?' on the left and 'Don't have an account? Sign Up' on the right. The 'Don't have an account? Sign Up' link is highlighted with a red rectangular border.

Complete the Registration form with the required information: First Name, Last Name, Email Address, Password, and Agency. Select Sign Up when the information is complete.

Figure 2. Registration form for users creating their own account.

- Use an agency email address whenever required by your organization.
- Choose the correct agency; this may affect the administrator or scope that can approve access.
- Save the sign-in email address and password securely.
- If the account is not immediately able to view data or menus, contact the agency or system administrator for access assignment.

2. What happens after sign-up

Registration creates the user account. It does not necessarily grant every ATSPM 5 function or every location. Access is controlled by roles and, where configured, by Regions, Jurisdictions, and Areas. An administrator should review the new account and assign only the access required for the user's work.

3. Administrator: assign access

Open the administrator menu and select Users. Locate the user, open the Actions menu, and choose Edit. In User Details, verify the user's identity, username, email, agency, and requested access.

Figure 3. User Details fields used to review and assign access.

User Details

First Name: Local

Last Name: User

Username: LocalUser@LocalUser.com

Agency: Frisco

Email: LocalUser@LocalUser.com

Roles: [Dropdown]

Regions: [Dropdown]

Jurisdictions: [Dropdown]

Areas: [Dropdown]

- ☐ User Admin
- ☐ Watchdog Subscriber

The user list provides a quick review of Full Name, Username, Email, Agency, Roles, Regions, Jurisdictions, and Areas. The Actions menu provides Edit and Delete.

Figure 5. Manage Users list after an account is updated.

Info Admin AA

Manage Users

Full Name	Username	Email	Agency	Roles	Regions	Jurisdictions	Areas	Actions
Admin Admin	Joseph.Young@kimley-horn.com	Joseph.Young@kimley-horn.com	Transportation Agency	Admin				⋮
Local User	localuser@localuser.com	localuser@localuser.com	Frisco	Admin				⋮

 User updated successfully. ✕

4. Role reference

Choose the least-privileged role that supports the user's job. A role controls what the user may do; geographic scope controls where the user may do it.

5. Create a custom role

Use a custom role when a built-in role is broader than necessary. Open the administrator menu, select Roles, and choose New Custom Role.

Figure 6. Manage Roles includes built-in roles and Custom Roles.

Manage Roles

Name	Description
Data Admin	Can access and export raw data logs from the export page.
General Configuration Admin	Can manage all system-wide configurations except location-specific settings.
Location Configuration Admin	Can manage location-specific settings and configurations.
Device Admin	Can manage devices, products, and device configurations.
Role Admin	Can manage roles and permissions.
User Admin	Can manage Users.
Report Admin	Privileges are granted to access restricted reports.
Usage Admin	Can view, edit, and delete usage reports.
Watchdog Subscriber	Can view Watchdog reports and is subscribed to email notifications for Watchdog alerts.
Admin	Full access to all configurations, data, reports, and user management.

Custom Roles

+ NEW CUSTOM ROLE

Name	Actions
SpeedConfigurationAdmin	⋮
ApiKeyAdmin	⋮

Figure 7. Create New Role permission selectors.

Create New Role

Role Name

User
Update and delete user accounts, and assign roles to users. None

Role
Manage roles, and assign permissions to roles. None

Location Configuration
Manage locations info and settings. None

General Configuration
Manage faqs, areas, regions, jurisdictions, etc. None

Data
Export raw event logs. None

Watchdog
View the system's watchdog logs and subscribe to daily watchdog email updates. None

Report
View the left turn gap report. None

CANCEL SAVE

- Give the role a function-based name, such as Report Reviewer or Location Data Exporter.
- Leave permission families at None unless the user needs them.
- Add only the required permission level for User, Role, Location Configuration, General Configuration, Data, Watchdog, or Report.
- Save the role, verify it appears under Custom Roles, and assign it from User Details.
- Test the role with a non-production or test account when possible.

6. Quick troubleshooting

Administrator reminder: review access periodically, remove stale accounts or permissions, and avoid assigning Admin when a narrower role is sufficient.

Role	Use it for
Admin	Full access to configurations, data, reports, and user management.
User Admin	Managing user accounts and assigning roles.
Role Admin	Managing roles and permissions.
Data Admin	Accessing and exporting raw data logs.
Device Admin	Managing devices, products, and device configurations.
General Configuration Admin	Managing system-wide configuration except location-specific settings.
Location Configuration Admin	Managing location-specific settings and configurations.
Report Admin	Accessing restricted reports.
Usage Admin	Viewing, editing, and deleting usage reports.

Role	Use it for
Watchdog Subscriber	Viewing Watchdog reports and receiving Watchdog email notifications.
Api Key Admin / Speed Configuration Admin	Use only when the deployment confirms the specific need and permission.

Problem	Check first
User cannot see Users or Roles	Confirm User Admin or Role Admin is assigned, then have the user sign in again.
User sees no locations	Review Regions, Jurisdictions, and Areas.
User can view but cannot export	Review Data permission.
User cannot see a restricted report	Review Report permission and geographic scope.
Watchdog notifications are missing	Confirm Watchdog Subscriber, email address, and notification behavior.
